## Wonders of Kihavah

A CLOSER LOOK BENEATH THE SURFACE

Anantara Kihavah Maldives Villas continues to set itself apart with experiences rooted in natural wonder. Backed by a comprehensive scientific study conducted from 2022 to 2023, our renowned house reef has been documented to host over 300 species of fish and more than 130 types of coral.

This research led to the creation of Wonders of Kihavah, a beautifully curated publication capturing the island's vibrant marine biodiversity through the lens of professional marine scientists. An invaluable tool for eco-conscious travellers and nature lovers, and a true differentiator in the Maldives.

## SEA: the world's only underwater caviar restaurant

Home to the only underwater caviar restaurant, guest can descend 6 meters below the sea to have an incredible dining experience. Offering curated breakfasts, wine tastings, and multi-course fine dining experiences, this is an experience of a lifetime. Michelin-starred chefs will continue to host exclusive private dining experiences throughout Q3 and the line-up will be announced soon.
