# Organic & Biodynamic Wines

Organic wines give us a pure and unmodified expression of grapes and terroir through healthier vineyards that are naturally resistant to plant diseases and extremes of weather. Along with the obvious environmental benefits, we feel strongly that organic wines offer the consumer a level of purity, balance and complexity that is superior to that of "ordinary" wines.

# Champagne

Is the Queen of Sparkling Wine?

Although many sparkling wines are made by the famous *méthode traditionnelle* they do not have the quality and elegance of the best Champagne. Please remember that Champagne is sparkling wine made in Champagne; if it is not made in Champagne then it cannot be called Champagne.

The different grape varieties used in Champagne production are Chardonnay, Pinot Noir and Pinot Meunier. All champagnes are recognised for their specific taste; the better houses have hundreds of years of experience in blending Champagnes. A typical blend of grapes might be: Chardonnay, Pinot Noir and Pinot Meunier, however there is much secretism surrounding blending recipes and production methods.
