Inspired by the 'PA-TA-PEA' CLAN (EARTH) who consisted of farmers, fishermen, gardeners, carpenters, black-smiths, and miners. They believed that a connection to earth would bring them health benefits. Not only would they build their homes on ground level, they'd also incorporate earth into their walls, roofs and furniture, even the beds they slept on were made from soil and clay.

#### Tent Pool Villas

- 7 x One bedroom villas – 140m<sup>2</sup>, pool size 30m<sup>2</sup>

The 'RHON-JORN' CLAN (WANDERERS) were adventurous people consisting of foragers, herders, performers, traders, and explorers, who spent their time trading goods with other tribes they'd encounter on their journeys. Due to their nomadic ways they'd prefer to construct semi-permanent homes, so they could easily move on, hence we celebrate them with our design.

#### Tree Pool Houses

- 7 x One bedroom houses (2 floors) 160m<sup>2</sup>, pool size 25m<sup>2</sup>

The 'WE-HA' CLAN (SKY) was a group who built their homes elevated from the ground and in the tree tops in order to obtain better creativity and liberty. The clan included the talents of creators, architects, inventors, healers and geologists. The villas give the impression that they are suspended from the trees with some furniture also using suspension as a feature.

#### Bird's Nest Pool Villas

- 8 x One bedroom villas – 185m<sup>2</sup>, pool size 30m<sup>2</sup>

The 'RUNG-NOR' CLAN (NEST) members enjoyed an opulent lifestyle. Their craving for exclusivity resulted in the woven tangle of a birds nest design. This clan was thought to be more superior intellectually and comprised of artists, musicians, poets, philosophers and astrologers. They would bathe under the moonlight believing that their souls would be replenished, thus the inspiration for these villas.
