#### Exfoliation and Foam Massage:

The "kese" is a scrubbing mitt, primarily made of natural silk threads and horsehair, used in conjunction with a foam massage glove (in Rai Spa Premium, the kese is made according to our personal order). This provides an indispensable experience for gently removing dead epidermal cells from the skin's surface.

It rejuvenates the skin and helps it "breathe." It allows the skin to rid itself of dead cells (blemishes, acne, redness, peeling) and refreshes the skin. It has beneficial effects on joints and muscles. This process helps your skin look beautiful, even aiding in tanning.

The foam massage is a combination of aromatic soap foam and special massage techniques performed by a professional master. This procedure is carried out only in a hammam with a hot marble surface, a unique microclimate, and an atmosphere of complete peace and quiet. Along with the soap foam and bathing procedures, massage techniques contribute to effective cleansing of the skin, help combat aesthetic flaws, and, most importantly, provide a sense of sweet happiness and mental satisfaction.

#### THAI MASSAGE:

This massage is performed using traditional Far Eastern massage techniques, closely associated with Thailand, and involves around 60 stretching, flexing, and pressure movements on a mat reminiscent of Thailand. The aim of the massage is to increase body flexibility, open energy channels believed to exist in the body, and restore balance.

## THAI REFLEXOLOGIE:

This therapy is based on Acupuncture. It involves stimulating reflex points on the hands and feet to generate electrochemical messages that, with the help of neurons, stimulate the corresponding organs. The feet are most commonly chosen for application due to the high density of nerve endings. It affects blood circulation and all organs.

## MEDICAL MASSAGE:

It is an effective therapy method that has been used for centuries in the treatment of various ailments. There are many different types of massage, distinguished by their application techniques and methods of affecting the body. The widespread use of therapeutic massage as an independent or complex therapeutic tool stems from its wide range of indications and a small list of contraindications. Therapeutic massage is also an excellent aid in the rehabilitation period following injury or illness. It supports the rapid restoration of all major functions and systems and significantly increases the patient's well-being.

## BALIAN MASSAGE:

At our center, Bali massage is performed by professional massage therapists. In Bali massage, a combination of Swedish massage, acupressure, and massage techniques is used. Thanks to relaxation techniques, you will feel completely relaxed and relieved after the massage.

Hot Stone Massage:

Hot stone massage is a type of massage developed by massage therapist Mary Nelson, which involves heating basalt stones with high iron density and placing them on key points of the body, followed by a massage using the stones by the therapist. As the basalt stones gradually release heat, you will feel completely relieved and relaxed after the massage, having released all tension.

## Deep Tissue Massage:

Deep tissue massage is performed by applying slow, deep pressure to the deep muscles, fascia, and connective tissues in cases of chronic pain, restricted mobility, postural problems, chronic muscle tension, fibromyalgia, and similar conditions.

## SHIATSU Massage:

Based on the principles of Acupuncture, Acupressure massage involves stimulating Acupressure points with various pressure techniques for the purpose of relaxation or to benefit from its healing effects..

## Lymphatic Drainage Massage:

Lymphatic drainage massage is a gentle body massage that helps to eliminate excess fluid from the body and speeds up metabolism. As a result of this massage, it is possible to get rid of excess fluid retention in the body as well as extra weight, and reduce the appearance of cellulite.

## Anti-Stress Massage:

An hour-long anti-stress session using aromatic oils leaves you feeling completely relaxed and calm. The massage involves slow and deep manipulations.

## Sultan Massage:

The traditional massage is applied by two masseurs simultaneously, targeting different areas of the body. This massage, which eliminates your fatigue, will make you feel like a real Sultan afterward.

## Ayurveda:

Ayurveda is one of the treatment methods used in traditional Indian medicine. It involves the application of sesame oil, purified from pure water molecules, heated to body temperature, to the whole body or a specific area using a special technique (massage). The Ayurveda (full body) massage applied by our expert staff at our spa center will provide you with a unique relaxation experience.
