Local Attractions

Side Ancient City – 5.4 km

Side Ancient City is a remarkable archaeological site located on Turkey's southern coast, near the town of Manavgat in Antalya Province. Dating back to the 7th century BCE, it was once a major port city in ancient Pamphylia and later flourished during the Roman era. Visitors can explore well-preserved ruins such as the grand amphitheater, Roman baths, monumental city gates, temples (including the famous Temple of Apollo), and a scenic ancient harbor. With its rich historical legacy and coastal beauty, Side is a must-visit for history enthusiasts and travelers alike.

Köprülü Canyon – 59 km

Stretching over 14 miles (22.5 kilometers) between towering rock formations and dramatic cliffs—some reaching up to 1,312 feet (400 meters)—Köprülü Canyon is one of Turkey's most stunning natural landmarks. Formed by the Koprucay River cutting through limestone, the canyon is the highlight of Köprülü Canyon National Park, offering breathtaking views and thrilling outdoor activities like rafting and hiking.

Temple of Apollo – 5.6 km

The Temple of Apollo is one of Side's most iconic landmarks, beautifully positioned on the edge of the ancient town overlooking the sea. Dating back to the 2nd century AD, legend has it that the temple was a romantic gift from Mark Antony to Cleopatra. Five original Corinthian columns still stand tall, creating a striking silhouette against the Mediterranean backdrop.

Manavgat Waterfall (Manavgat Şelalesi) – 9 km

Located just outside of Side, the Manavgat Waterfall is one of the most scenic spots along the Manavgat River, which flows from the Taurus Mountains to the Mediterranean. These wide, low falls are ideal for photos and a favorite for relaxing activities like picnicking, swimming, or taking a boat cruise along the river.

Side Museum (Side Müzesi) – 5.5 km

Side was once a major Mediterranean trading port, attracting Greek merchants as early as the 6th century BCE and later thriving under Roman rule. Many of the artifacts from this period are now housed in the Side Museum, located in a restored Roman bath complex from the 5th century AD. Converted into a museum in the 1960s, the site displays ancient weapons, sculptures, sundials, mosaics, tombs, and more—offering a fascinating look at the city's Greek, Roman,

Aspendos Bridge – 27 km

Originally built during the Roman era in the early 4th century AD, the Aspendos Bridge was later reconstructed by the Seljuks in the 13th century after an earthquake destroyed the original. The new bridge was built using stones from the ancient city of Aspendos, preserving its historic essence. Today, the bridge stands as a symbol of architectural resilience, linking ancient Roman engineering with Seljuk craftsmanship.
