

JOIN ISLAND LUXURY SUSTAINABILITY JOURNEY

Our efforts for a greener future.

At Island Luxury, we are committed to protecting the natural beauty of the Maldives while providing you with the highest standards of care. Small actions, both from our team and our guests, help us make a meaningful difference.

KEY INITIATIVES

We reduce water use by changing towels and bed linen only upon request or at set intervals, supported by efficient water management systems.

We promote energy efficiency through the use of low-consumption lighting and appliances, natural ventilation, and mindful use of air conditioning.

We actively work to protect the marine environment by minimizing pollution, encouraging responsible activities, and supporting conservation initiatives.

We aim to minimize single-use plastics by offering refillable water options and encouraging reusable alternatives for both guests and staff.

We prioritize locally sourced food and products to support our island communities and reduce environmental impact.

We implement waste separation and responsible disposal practices while working to reduce overall waste generation.
