

MEET THE NATIVES

JELLYBEAN & SQUAD

Jellybean and his family and squad lives here too! You will see a lot of them in different shapes, colours and breeds! It's a CAT-nation!

Fun Fact: JellyBean & Squad consists of bengals, british shorthairs, Siamese mixes and Persians! They even have their own Tik Tok @jellybeanandsquad

GUS GUS THE GARDEN LIZARD

Gus Gus spends his time catching the flies and insects for you! A good friend to have around in your garden!

Fun Fact: Lizards live almost everywhere! Apart from Antarctica, Lizards are found on every other continent! Lizards have a variety of natural habitats including marshes, rocky mountainsides and forests.

MOMMO THE FRUIT BAT

Fruit bats are common here in Siyam World, these majestic creatures of the nights can be found hanging on the trees and feeding on the delicious fruits and they play crucial roles in the conservation of nature.

Fun Fact: Fossil records of fruit bats are quite rare, and scientists suggest that around 98% of their fossil history is missing.

WAHEEDA THE WHITE BREASTED WATERHEN

These cute birds feed on grass, shoots and worms. They breed usually between June and October

Fun Fact: Even though they are called Waterhen they are unable to swim. DON'T WORRY, our LIFE team always look out for them!

THUTHTHU THE TURTLE

Thuththu the turtle lives on our house reef, you can spot him and his family when you go snorkeling!

Fun Fact: Turtles are some of the oldest animals around. If you've never had a turtle, you might not know just how long their life spans can be. In general, turtles evolved millions of years ago, and as such are among the oldest groups of reptiles. As pets, certain species of turtles can live to be 10-150+!

RIMICHI THE DOLPHIN

When you go on the lucky sunset dolphin cruise you can spot Rimichi and the family! A great sight to see with the gorgeous sunset!

Fun Fact: They are not only the friendliest or caring creatures but also the most intelligent ones. It is believed by scientists that comparing the ratio size of brain to body, dolphins take the 2nd place right after the humans!

SHARA THE HERON

Shara can be seen near the water villa bridges, hunting for fish by the lagoon, a beautiful mystic creature!

Fun Fact: Herons are excellent flyers that can reach the speed of 48 kilometers (30 miles) per hour. During the flight, their neck is curled in S-shape, while legs dangle behind the body.

TEDDY THE BABYSHARK

Teddy hangs around lagoon quite often and hes very friendly, he lives with his family around the reef.

Fun Fact: Sharks have evolved in the past 470 million years and unbelievably there are about 440 different species! Sharks are loners and hunt and live by themselves.

AVAADH THE WHALE SHARK

Avaa can spotted out in the ocean gliding through, a truly majestic creature!

Fun Fact: Whale sharks are not actually whales, but they are the largest fish in the ocean! Whale sharks can reach up to an incredible 12 meters/40 feet in length and 21.5 tons in weight.

NADIYA THE KOEL

Koels can be found around your garden, in the trees. Koels eat fruits and insects and have a very distinctive call.

Fun Fact: Koel is a large cuckoo that feeds mainly on fruits and berries in trees, feasting on the ripe fruits. It also consumes insects and caterpillars.

SAIF THE STING RAY

Saif the sting ray is very popular, he graces us with his presence once in a while near the jetties.

Fun Fact: Stingrays give birth each year. They can have between 2 and 6 babies a year, each which can live between 15 and 25 years in the wild.

RAZZAQ THE EAGLE RAY

Razzaq is a beautiful creature that glides throughout our reefs and lagoon. Spot him while your snorkeling or canoeing

Fun Fact: A spotted eagle ray's pattern is unique to each individual, just like a fingerprint.
